

Did you know that snow removal operations are regulated by a snow removal policy?

In actual fact, Montréal's City Council adopted a snow removal policy in 2015 in order to standardize performance and ensure consistency in snow removal practices on its territory. Under this policy, snow loading operations in the 19 boroughs get under way at the same time, from now on. In addition, the policy specifies the standards on snow clearance, spreading abrasives and snow loading.
