

## Do you know the standards and timelines for snow removal operations on Priority 3 streets?

### Priority 3 (214 km)

Local streets. Examples: Baldwin, Hélène, Dauville

	Snow clearance	Spreading abrasives	Snow loading (streets where there are sidewalks)
For sidewalks	Once 2.5 cm has accumulated on the ground; between 2.5 and 5 cm on the ground, with simultaneous abrasive spreading	Based on visual inspections of crews on site. The operation must be completed within a maximum time limit of 8 hours.	Since the snow is piled up in the proper place along the roadway, it is removed at the same time as the snow on the roadway.
For roadways	Once 5 cm has accumulated on the ground	Based on visual inspections of crews on site  No time limit	36-96 hours maximum (snowfall of 20 cm on the ground or less)
