

Do you know the standards and timelines for snow removal operations on Priority 1 streets?

Priority 1 (27 km)

Major arteries and large commercial streets, priority bus routes and reserved lanes, very narrow streets, etc.
Examples: de Pierrefonds, Saint-Jean, des Sources, etc.

	Snow clearance	Spreading abrasives	Snow loading (streets where there are sidewalks)
For sidewalks	Once 2.5 cm has accumulated on the ground; between 2.5 and 5 cm on the ground, with simultaneous abrasive spreading	Based on visual inspections of crews on site. The operation must be completed within a maximum time limit of 4 hours.	Since the snow is piled up in the proper place along the roadway, it is removed at the same time as the snow on the roadway.
For roadways	Once 2.5 cm has accumulated on the ground	<p>Within 3 hours maximum, if less than 2.5 cm</p> <p>From the start of operations, if more than 2.5 cm</p>	Within 36 hours maximum
