

MONTRÉAL

Smart
and
Digital City

The prestigious Intelligent Community Forum (ICF) has selected Greater Montréal as a 2014 Smart 21 City from among 400 candidates.

Montréal's mayor clearly expressed his desire for Montréal to become an internationally acclaimed smart city like New York, Lyon, Barcelona and Amsterdam. Doing so means defining the Montreal Smart and Digital City 2014 Strategy.

FOUR-PART APPROACH

1

COLLECT

TRANSPARENT MANAGEMENT, OPEN GOVERNMENT

Free up masses of data and develop ways for people to access and display it.

Collect and analyze telemetric data to enhance control over and optimization of public resource use.

2

COMMUNICATE

ACCESS SYSTEMS, INFORMATION DISTRIBUTION

Develop a Web portal and mobile apps that transmit information to residents in real time.

Deploy broadband wired and wireless networks.

Create learning centres and local new technology sites.

3

COORDINATE

DIGITAL PUBLIC SERVICES

Develop smart transportation, infrastructure, security, energy, water and environmental management systems.

Digitalize public services while preserving traditional access (311, permit issuance, etc.).

4

COLLABORATE

SUPPORT INDUSTRIES, STIMULATE INNOVATION AND CREATIVITY

Assist private and institutional stakeholders in creating a network of technology incubators/accelerators.

Support needs of technology start-ups.

Promote use of public space as a laboratory for testing ground-breaking solutions for municipal challenges.

2014 SCHEDULE

Define the 2014 Montréal Smart and Digital City Strategy.

Launch identification of key projects, while formulating a funding plan and project partnership program.

DIGITAL SMART CITY OFFICE

An expert team of four professionals, reporting directly to the Director General's Office.

A Chief Digital Officer (CDO) helming the organization and guided by a strategic approach.

An annual report on each project submitted to municipal decision-making bodies.

An annual budget of \$500,000.
