

I wish to make my comments clear regarding the stoppage of publisacs.

As I am on a fixed income, like many in this city, it is important for me to shop the most economical way possible for groceries and household items. The Publisac gives me the means to do this. I cannot imagine using my car to visit each grocery store to see which has the best prices for the week. You say you are trying to stop gas emissions but without the Publisac that's what is going to happen.

You can make the argument that I can use the Internet to get the flyers, but who's going to pay for my internet bills?

I was recently talking to neighbours in my area and they are not receptive to getting rid of them. Most use them.

Why aren't you outlawing advertising sent by Post Canada. My mailbox is always full of garbage advertising that goes straight to the recycle bin. It's never anything important. I think you should take the federal government to task. That is something you should be looking into.

Loto Quebec is another institute where there is mounds of paper produced. Giving bills for ticket purchases, tons of non winning scratch tickets, paper for billets non gagnant, it's pretty awful.

Never mind removing publisacs. We should be concentrating on air traffic causing air pollution. I live near the airport and there are planes coming in and out all the time. Less airplanes flying around would be a great idea.

Fix the roads, make sure cars aren't idylling.

I want my Publisac and my suburban newspaper. If the millennials or anyone else don't want it, all they have to do is put a sign on their mailbox or on the side of their door saying "pas de Publisac, Merci ". It's simple.

I just needed to replace my furnace with an electrical one because you are outlawing oil heating. Make sure I have the means to budget for this new furnace - for me publisacs are my way.

Regards

Diane Brongel & Denis Langlais
