

Notice of work

Boulevard de Pierrefonds

**Between rue Winnie-Wakefield and
rue Paul-Pouliot**

Start: week of August 22

End: week of August 29

Paving Work

Despite the cycle of freeze and thaw, the density of traffic and the use of heavy vehicles which together weaken the roads, the maintenance of the road network is given special attention in order to preserve comfortable and safe roadways for everyone.

Impact on your daily life

Traffic

- Partial and complete closure and obstruction planned;
- Detours to facilitate traffic flow will be set up if needed;
- Follow temporary signage

Parking

- Temporary spaces used for equipment and to ensure a safe perimeter around work site. See the signage for details.

Good to know

Access to buildings

- Access to homes and buildings will be maintained.

Buses

- Certain bus routes may be modified. For information: STM-INFO : (514) 786-4636 or stm.info

Garbage, recyclables and compost

- Collection schedule will be maintained. Garbage cans and bins that are not accessible to the collectors will be moved by the company performing the work. Each container must be clearly identified with your address so it can be returned to the right place.

Work Schedule

- During the day from 7:00 a.m. to 7:00 p.m.;
- Weather conditions may cause schedule changes.

Suggestions to improve construction related communications? Let us know about your experience via an online survey which can be accessed with the QR code.

●●●●● Localisation des travaux

- Asphalt, a mixture of gravel, sand and tar (bitumen), is very versatile and can be adapted to traffic by varying its thickness. Therefore, it will be thicker on roads regularly used by heavy vehicles and on high-volume traffic lanes than on less busy residential streets.
- Asphalt is also recyclable. Once the existing pavement is removed, it is melted and mixed with the new material and then reused for the new paving.
- In 2019, a work-site squad was formed. Quality control of the infrastructure work during numerous site visits allows us to verify that the materials used meet the required standards as well as to standardize paving techniques.
