Objet Wood stove bylaw not enough

To whom this may concern,

I am a Dollard-des-Ormeaux resident and totally disagree with this bylaw. I will continue to burn my one cord of wood every winter until I get ticketed, then with go to the courts and plead unfairness that camping site can burn wood all summer long. If they are to ban fireplaces, they must also ban any wood burning to all. What is good for one should be good for others. I should have the same rights as others.

If this bylaw is passed, I will fight to make sure every single camping site are also banned from burning wood to have fun with marshmallows (It's only purpose, to sit around the camp fire) Has anyone ever calculated how many cords of wood are burned every summer. It 30 degrees out, but people sit around the campfire.

My fireplace heats up part of my house and has a purpose, it also act as a secondary heat source, as a back up to electricity failures, but camping sites have absolutely no purpose. Sole purpose is for entertainment. They also cause forest fires causing expenses and increase taxes.

Why hasn't anybody taken the time to calculate or estimate the amount of wood burnt at camp sites in Quebec.

This would make for good reading
